

Aditansh Kashyap

Email: aditanshkashyap@gmail.com | GitHub: github.com/aditansh | LinkedIn: linkedin.com/in/aditansh

Professional Summary

Software Engineer with strong experience in full stack development, algorithms, and system design. Proficient in multiple programming languages and modern frameworks. Passionate about building scalable applications and solving complex problems.

Technical Skills

Programming Languages	Python, JavaScript, TypeScript, Java, C++, C#, Go, Rust
Frontend	React, Next.js, HTML5, CSS3, TailwindCSS, Vite
Backend	Node.js, Express.js, REST APIs, JWT Authentication
Databases	MongoDB, PostgreSQL, MySQL, Redis
Dev Tools	Git, Docker, Linux, CI/CD, VS Code

Experience

Full Stack Developer - Personal and Academic Projects

- Built a Job Application Management System using React, Node.js, Express, and MongoDB.
- Implemented authentication using JWT and secure password hashing.
- Designed RESTful APIs and connected frontend services to backend controllers.
- Developed responsive UI with TailwindCSS and modern component libraries.

Software Engineering Projects

- Created applications involving data visualization, API integration, and automation.
- Built tools in Python and JavaScript for data processing and analysis.
- Developed web interfaces for interactive dashboards and applications.

Projects

Job Application Management System

Full stack MERN application allowing applicants and recruiters to manage applications, profiles, and interview schedules with role based dashboards.

Programming Tools and Experiments

Developed experimental tools involving graphics rendering, algorithm simulations, and interactive programming visualizations.

Education

Bachelor's Degree in Computer Science (In Progress)

Focus on Software Engineering, Algorithms, Data Structures, and System Design.
